**CHAIRMAN'S STATEMENT**

Dear Shareholder,

It has been an eventful six months - sufficiently so for your Board to feel, contrary to its customary approach, that a brief letter from the Chairman is warranted even at the interim stage.

First and foremost, there has been a modest return of capital resulting from the disposal by the Company of its entire stake in China Hydroelectric, a company listed on the New York Stock Exchange, at a price of US\$3.51 per share. By way of background, the price achieved was at a substantial discount to the price at which the shares were acquired in the first place (US\$10.36), but at a significant premium to the lowest price at which these shares were traded since acquisition (US\$0.62). Almost the total sum realised has been distributed to shareholders without any meaningful retention for future expenses. The Board felt that this was in the best interests of shareholders who have witnessed a sufficient diminution in the value of their investment over the past six years. It is also consistent with the Board's commitment to shareholders, first made in the Circular to Shareholders of 20 September 2012 and reiterated in the 2013 results on 30 April 2014, to realise the Company's investments and return capital as expeditiously as possible.

Electronic payments and cheques were despatched by the Company's registrar, Capita Registrars Limited, on 12 September 2014. If you have not yet received your payment, you are urged to contact the registrars by email on [ssd@capitaregistrars.com](mailto:ssd@capitaregistrars.com) or by telephone on 0871 664 0321 Alternatively, please contact the Company Secretary by email on [info@praxisgroup.com](mailto:info@praxisgroup.com).

Shareholders will recall the aborted sale of the Company's interest in Ranhill Water Technologies (Cayman) Limited to the Ranhill Group. This transaction has since been revived on terms that are detailed elsewhere in this Report; while the revised terms are not as attractive as those negotiated originally, your Board believes that they represent fair value for the Company's shareholders. The sale is conditional on a number of factors and is expected to complete by 28 February 2015. The Board expects to make a further distribution of capital on completion of this transaction.

It is with deep regret that I have to advise shareholders of the untimely death of Luc Vriens, founder and Chief Executive of Waterleau. He will be much missed, both professionally and personally, and our thoughts are with his family and all his colleagues at Waterleau. Bart Goedseels, a current director of Waterleau, has been appointed as the company's new Chief Executive. The Investment Manager and your Board look forward to working closely with him on the future strategy of the company.

Details on the other investments held by the Company are set out in the Manager's report.

Shareholders will also recall that in my letter of 30 April 2014 I had made reference to the Company's relationship with its manager, Four Winds Capital Management (Cayman). Our notice of termination of the Investment Management contract expires in July 2015 and while your Board will continue to review the situation with respect to the Manager, on available evidence it is unlikely that this contract will be renewed. The Board will explore solutions to the expected change in the Investment Manager and hopes to report further at the year end.

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED 30 JUNE 2014

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Basis of Presentation**

These Unaudited Condensed Interim Consolidated Financial Statements ("Interim Financial Statements") have been prepared in accordance with accounting principles generally acceptable in the US.

The Company's Interim Financial Statements are presented in Euro which is the functional and the reporting currency of the Company

**Basis of Consolidation**

Under the Accounting Standard Codification ("ASC") Topic 810, "Consolidation" ("ASC 810"), consolidation by an investment company of a non-investment company investee is not appropriate within the scope of Topic 946 Financial Services - "Investment Companies". An exception to this general principle occurs if the investment company has an investment in an operating company that provides services to the investment company. The Interim Financial Statements consolidate the financial statements of the three wholly owned subsidiaries of the Company;

- Aqua Resources (In-Pipe) Holdings Limited ("ARIHL"), a Guernsey limited company formed in August 2009;
- Aqua Resources Asia Holdings Limited ("AR AHL"), an exempt company incorporated in the Cayman Islands formed in October 2008; and
- Cooperative Aqua Netherlands Holdings UA, a Dutch co-operative company formed on 22 March 2010.

AR AHL wholly owns a subsidiary, Robinson Investments Limited, which is an exempt company incorporated in the Cayman Islands formed in October 2008 and Cooperative Aqua Netherlands Holdings UA wholly owns a subsidiary, Aqua Netherlands Holdings BV, which is a Dutch special purpose vehicle formed on 26 March 2010. All intercompany accounts are eliminated on consolidation.

**Segment Reporting**

The Directors are of the opinion that the Company is engaged in a single segment of business, being water-related investment opportunities.

*Transfers in or out of level 3*

The ASU requires entities to discuss the reasons for these transfers and to disclose the transfers on a gross basis. Transfers into level 3 must be separately disclosed from transfers out of level 3. The ASU also requires that entities disclose their policy for determining when transfers between levels are recognised and provides the following examples of policies;

- i. the actual date of the event of change in circumstances that cause the transfer
- ii. the beginning of the reporting period
- iii. the end of the reporting period

The Company is using the policy of recognising transfers at the beginning of the reporting period.

The Company's policy about the timing of recognising transfers into the hierarchy levels is the same as the policy for recognising transfers out and this policy is applied consistently.

The table below shows a reconciliation of beginning to ending balances for Level 3 investments and the amount of total gains or losses for the period included in earnings attributable to the change in unrealised gains or losses relating to assets and liabilities held at 30 June 2014.

The table below shows a reconciliation of beginning to ending balances for Level 3 investments and the amount of total gains or losses for the year included in earnings attributable to the change in unrealised gains or losses relating to assets and liabilities held at 31 December 2013.

**Warrants**

The Company holds warrants to subscribe for a total of 55,366,136 ordinary shares of BBI expiring in November 2016.

The Company also holds warrants (via its subsidiary ARIHL) to subscribe for 74,225 of additional shares in In-Pipe, representing approximately 2% of the share capital of In-Pipe as at 30 June 2014. These warrants expire in August 2016.

**Equity Investments**

In determining an investment's placement within the fair value hierarchy, the Directors take into consideration the following.

Investments whose values are based on quoted market prices in active markets, and are therefore classified within level 1. These include listed equities. The Directors do not adjust the quoted price for such instruments, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include less liquid listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments also include private equity investments. When observable prices are not available for these securities, the Directors use one or more valuation techniques (e.g., the market approach or the income approach) for which sufficient and reliable data is available. For fair value measurements using significant other observable inputs (level 2) and significant unobservable inputs (level 3), if there has been a change in the valuation technique, the reporting entity shall disclose that change and the reason for making it. Within level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors.

The inputs used by the Directors in estimating the value of level 3 investments include the original transaction price, recent transactions in the same or similar instruments, completed or pending third-party transactions in the underlying investment or comparable issuers, subsequent rounds of financing, recapitalisations and other transactions across the capital structure, offerings in the equity or debt capital markets, and changes in financial ratios or cash flows. Level 3 investments may also be adjusted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by the Directors in the absence of market information.

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
FOR THE SIX MONTHS ENDED 30 JUNE 2014

2. INVESTMENTS (CONTINUED)

**Equity Investments (continued)**

The fair value measurement of level 3 investments does not include transaction costs that may have been capitalised as part of the security's cost basis. Assumptions used by the Directors due to the lack of observable inputs may significantly impact the resulting fair value and therefore the Company's results of operations. The actual amounts realised on a disposal of any investments could differ from their carrying values, and these differences could be significant.

As at 30 June 2014 the investments held by the Company which were valued using an estimate of fair value were as follows;

**Ranhill Water Technologies (Cayman) Limited**

The Company has valued its holding in RWT based on the valuation in the executed conditional sale and purchase agreement with the Ranhill Group, less a 20% discount to allow for execution risk.

**Waterleau Group**

The Company has valued its holding in Waterleau based on the principal amount of the convertible bond plus the implied value of interest earned during the holding period, less a discount of 30% in respect of credit and liquidity risk. This methodology is the same as that applied in the Company's 2013 Annual Report.

**In-Pipe Technology**

The Company has valued its holding in In-Pipe by applying a 1 times multiple of annual revenues. This methodology is the same as that applied in the Company's 2013 Annual Report.

**Bluewater Bio International**

The Company has valued this investment at nil value as at 30 June 2014. The Manager will revisit this valuation in the next reporting period.

**China Hydroelectric Corporation**

The Company owned approximately 3.67% of CHC's ordinary shares (representing 1,980,538 ADS) and the valuation of the Company's investment in CHC is based on the closing price on 30 June 2014 in an active market of US\$3.44 per ADS.
